

COMP 7745 Machine Learning

Weizi Li

Department of Computer Science
University of Memphis

- Course website has all information about this course
- Canvas will be used for hosting slides and submitting assignments

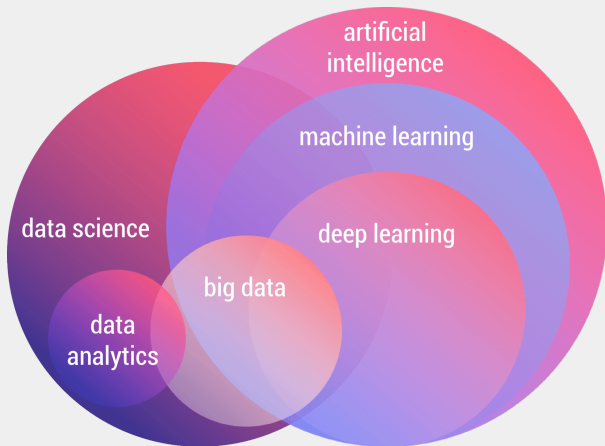

■ Prerequisites

- ▶ Math: basic Linear Algebra, Calculus, and Probability Theory
- ▶ Programming: **proficient with Python**

■ Course materials

- ▶ No required textbook
- ▶ Slides ($\sim 80\%$)
- ▶ Whiteboard ($\sim 20\%$)

- Modern AI and deep learning (not exactly the topics found in Syllabi)

- Unit 1. Foundations
- Unit 2. Supervised Learning
- Unit 3. Unsupervised Learning
- Unit 4. Reinforcement Learning

- Machine Learning Basics
- Linear Models
- Non-linear Models

- Neural Networks Basics
- Convolutional Neural Networks
- Recurrent Neural Networks
- Optimization and Stochastic Gradient Descent
- Transformers

- Autoencoders
- Variational Autoencoder
- Generative Adversarial Networks
- Contrastive Learning

- Intro to Reinforcement Learning
- Markov Decision Process
- Deep Reinforcement Learning

- Grading Rubric
- Assignments
- Course Project
- Details are in course website

- Don't cheat!
- Following instructions about assignments and course project on course website **exactly**
- Put in efforts
